**ACROSS THE COUNTRY**

Most northern species recorded:
**BELUGA WHALE**
69.58°N
(Tuktoyaktuk Community Satellite BioBlitz, YT)

Most eastern species recorded:
**GREEN ALDER**
52.76°W
(St. John’s Community BioBlitz, NL)

Most western species recorded:
**KLUANE TIGER MOTH**
138.78°W
(Kluane Science-Intense BioBlitz, YT)

Most southern species recorded:
**DICKCISSEL**
42.57°N
(Norfolk Forest Science-Intense BioBlitz, ON)

**PARTICIPATION**

9,935 people took part in the 35 BioBlitz Canada 150 events

1,020 species experts shared their knowledge and passion

1,096 different observers uploaded observations

16,600 hours of volunteer time were donated

**SPECIES BY THE NUMBERS**

2,631 species of vascular plants

2,629 species of insects

370 species of birds

151 species of fish

99 species of mammals

42 species of reptiles

34 species of amphibians

And many species of arachnids, crustaceans, lichens, fungi, and protozoans

HERE'S WHAT CANADA’S NATURE SELFIE LOOKS LIKE!

The following results were recorded using the iNaturalist Canada app during 35 BioBlitz Canada 150 events held nationally in 2017.

Total includes 556 observations of species at risk, encompassing 87 species (COSEWIC* assessed or SARA* listed), among which:

- Prothonotary Warbler
- Monarch Butterfly
- Western Painted Turtle
- Gray Whale
- Yellow-banded Bumble Bee
- Spotted Wintergreen

*Committee on the Status of Endangered Wildlife in Canada
*Species at Risk Act
